TYPE IIR FACE MASK

FLUID RESISTANT FACE MASK

Type IIR fluid resistant face mask manufactured from 3 layer protective fabric providing optimal protection whilst preventing respiratory droplets from contaminating surfaces and other persons. Available with either super soft earloops or around the head ties, the adjustable nose wire forms a close fit.

This product is a class I medical device designed, produced and tested to conform to EN 14683 standards. Type IIR masks are recommended for primary, outpatient, community and social care settings, including national healthcare services and private sector.

KEY FEATURES

- ✦ $\geq 98\%$ BFE filtration
- ✦ Available with super soft earloops or around the head ties for a close comfort fit.
- ✦ Splash resistance pressure ≥ 16 kPa
- ✦ EN 14683:2019 compliant
- ✦ Microbial load ≤ 30 cfu/g
- ✦ Differential pressure < 60 Pa/cm²
- ✦ Protective 3 layer fabric
- ✦ Nose wire for close fit
- ✦ Latex Free

FACE MASK FEATURES & BENEFITS

Tecman's splash resistant Type IIR face mask is manufactured from 3 layer protective fabric. The outer splash resistant layer provides optimal protection against splashing and spraying, the critical middle layer acts as a filter preventing large particles from penetrating in either direction, and the inner layer absorbs and traps droplets and splashes from exhaled air providing improved levels of comfort

COMFORT & FIT

DESIGNED FOR OPTIMAL PROTECTION

- Designed for optimal wearer comfort
- Available with either super soft ear loops or around the head ties for a close comfort fit.

SAFETY & PERFORMANCE

CERTIFICATED AND QUALITY MANAGED

- EN14683:2019 compliant
- $\geq 98\%$ bacterial filtration efficiency

SUSTAINABILITY

INVESTING IN BIO-SOURCED MATERIALS

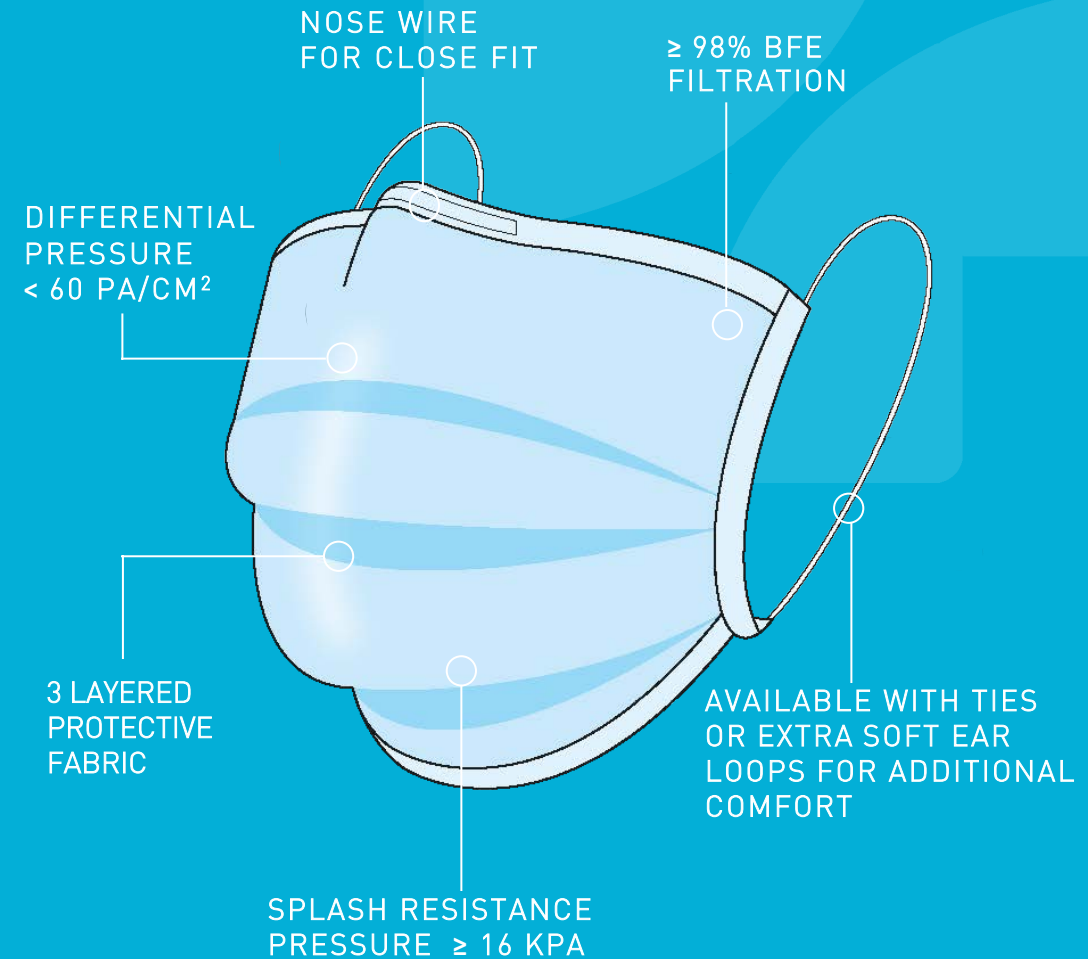

- We reinvest a significant proportion of profit into our R&D programme to develop sustainable bio-sourced material technology

COST

COST EFFECTIVE FACE MASK

- Competes with imported product from low cost regions
- UK made reduces freight costs and requirements
